Test case documentation.

Website: https://www.saucedemo.com/

1. Module: Login / Authentication

TC-LOGIN-001

Test case: Verify that a user can log in with valid credentials.

Preconditions:

- The SauceDemo website is accessible.
- The user is logged out and on the login page.

Test steps:

1. Open SauceDemo.
2. Enter the valid username: standard_user.
3. Enter the valid password: secret_sauce.
4. Click the Login button.
5. Observe the page displayed after login.

Test data:

Field	Value
Username	standard_user
Password	secret_sauce

Expected result:

The user should log in successfully and be redirected to the inventory page, displaying the available products.

Actual result:

Login was successful, and the inventory page displayed the available products.

Execution status:

PASS

TC-LOGIN-002

Test Case: Verify that a user can't log in with invalid credentials

Preconditions:

- The SauceDemo website is accessible.
- The user is logged out and on the login page.

Test steps:

1. Open SauceDemo.
2. Enter the valid username: standard_user.
3. Enter the invalid password: secret_sauce1.
4. Click the Login button.
5. Observe the page displayed after login.

Test data:

Field	Value
Username	standard_user
Password	secret_sauce1

Expected result:

The user should not be logged in. An appropriate error message should appear indicating that the username or password does not match.

Actual result:

Login was not successful, and an appropriate error message appeared indicating that the username or password does not match

Execution status:

PASS

TC-LOGIN-003

Test case: Verify that a user cannot log in using an invalid username and a valid password.

Preconditions:

- The SauceDemo website is accessible.
- The user is logged out and on the login page.

Test steps:

1. Open SauceDemo.
2. Enter an invalid username, such as invalid_user.
3. Enter the valid password secret_sauce.
4. Click the Login button.
5. Observe the error message displayed.

Test data:

Field	Value
Username	invalid_user
Password	secret_sauce

Expected result:

The user should not be logged in, and an appropriate error message should appear.

Actual result:

Login was not successful, and an appropriate error message appeared indicating that the username or password does not match

Execution status:

PASS

TC-LOGIN-004

Test case: Verify that the login form prevents submission when both the username and password fields are empty.

Preconditions:

- The SauceDemo website is accessible.
- The user is logged out and on the login page.

Test steps:

1. Open SauceDemo.
2. Leave the username field empty.
3. Leave the password field empty.
4. Click the Login button.
5. Observe the validation message displayed.

Test data:

Field	Value
Username	{empty}
Password	{empty}

Expected result:

The user should remain on the login page. An appropriate validation message should appear indicating that the username is required.

Actual result:

The user remains on the login page. An appropriate validation message appeared indicating that the username is required.

Execution status:

PASS

TC-LOGIN-005

Test case: Verify that login is rejected when the username is entered but the password field is empty.

Preconditions:

- The SauceDemo website is accessible.
- The user is logged out and on the login page.

Test steps:

1. Open SauceDemo.
2. Enter the username standard_user.
3. Leave the password field empty.
4. Click the Login button.
5. Observe the validation message displayed.

Test data:

Field	Value
Username	standard_user
Password	{empty}

Expected result:

The user should remain on the login page. An appropriate validation message should appear indicating that the password is required.

Actual result:

The user remains on the login page. An appropriate validation message appeared indicating that the password is required.

Execution status:

PASS

TC-LOGIN-006

Test case: Verify that login is rejected when the password is entered but the username field is empty.

Preconditions:

- The SauceDemo website is accessible.
- The user is logged out and on the login page.

Test steps:

1. Open SauceDemo.
2. Leave the username field empty.
3. Enter the password secret_sauce.
4. Click the Login button.
5. Observe the validation message displayed.

Test data:

Field	Value
Username	{empty}
Password	secret_sauce

Expected result:

The user should remain on the login page. An appropriate validation message should appear indicating that the username is required.

Actual result:

The user remains on the login page. An appropriate validation message appeared indicating that the username is required.

Execution status:

PASS

TC-LOGIN-007

Test case: Verify that a locked-out user cannot log in to the SauceDemo website.

Preconditions:

- The SauceDemo website is accessible.
- The user is logged out and on the login page.

Test steps:

1. Open SauceDemo.
2. Enter the username locked_out_user.
3. Enter the password secret_sauce.
4. Click the Login button.
5. Observe the error message displayed.

Test data:

Field	Value
Username	locked_out_user
Password	secret_sauce

Expected result:

The user should not be logged in. An error message should appear indicating that the user has been locked out.

Actual result:

An error message appeared indicating that the user has been locked out.

Execution status:

PASS

TC-LOGIN-008

Test case: Verify how the login form handles credentials containing leading or trailing spaces.

Preconditions:

- The SauceDemo website is accessible.
- The user is logged out and on the login page.

Test steps:

1. Open SauceDemo.
2. Enter the username standard_user, including a leading and trailing space.
3. Enter the password secret sauce.
4. Click the Login button.
5. Observe whether the login succeeds or an error message appears.
6. Repeat the test using the username standard_user and password secret_sauce.
7. Record the behavior for both attempts.

Test data:

Field	Value
Username (first attempt)	standard_user
Password (first attempt)	secret sauce
Username (Second attempt)	standard_user
Password (Second attempt)	secret_sauce

Expected result:

The application should handle credentials containing leading or trailing spaces according to the specified requirements. Record whether spaces are trimmed or treated as part of the credentials, and verify that the observed behavior matches the requirements.

Actual result:

First attempt: Login was unsuccessful, and an error message appeared indicating that the username and password did not match any user in the service.

Second attempt: Login was successful, and the inventory page displayed the available products.

Execution status:

PASS

TC-LOGIN-009

Test case: Verify that the password field hides entered characters to protect the user's password from being displayed in plain text.

Preconditions:

- The SauceDemo website is accessible.
- The user is logged out and on the login page.

Test steps:

1. Open SauceDemo.
2. Click the password field.
3. Enter the password secret_sauce.
4. Observe how the entered characters are displayed.
5. Verify that the password is masked rather than displayed as readable text.

Test data:

Field	Value
Username	Not required
Password	secret_sauce

Expected result:

The password characters should be hidden using masking symbols, such as dots or bullets, rather than displayed as plain text.

Actual result:

The password characters are hidden using masking symbols like dots.

Execution status:

PASS

TC-LOGIN-010

Test case: Verify that a user can log out successfully after logging in to the SauceDemo website.

Preconditions:

- The SauceDemo website is accessible.
- The user has valid login credentials.
- The user is logged in and viewing the inventory page.

Test steps:

1. Open SauceDemo.
2. Enter the username standard_user.
3. Enter the password secret_sauce.
4. Click the Login button.
5. Verify that the inventory page is displayed.
6. Click the menu button in the top-left corner.
7. Click the Logout option.
8. Observe the page displayed after logging out.

Test data:

Field	Value
Username	standard_user
Password	secret_sauce

Expected result:

The user should be logged out successfully and redirected to the login page. The user should need to enter valid credentials again to access the inventory page.

Actual result:

The user logged in successfully and logged out successfully. Then redirected to login page. User should need to enter valid credentials again to access the inventory page.

Execution status:

PASS
